

Invertebrates

ID Ring Tests, Own Sample Module and Laboratory References

Particle Size Analysis

Particle Size and Particle Size Own Sample Reanalysis

Fish

Ring Test and Reverse Ring Test

Macroalgae

Rocky Shore Algae ID Ring Test, Opportunistic Macroalgae % Cover and Macroalgae Biomass Ring Test

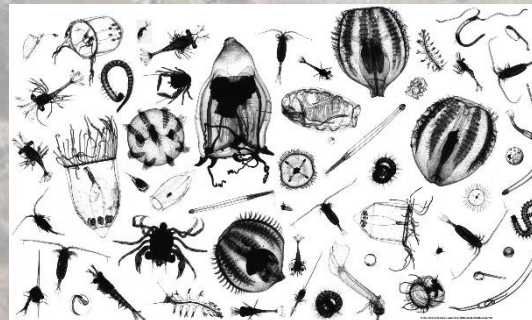

The National Marine Biological Analytical Quality Control Scheme

- Set up in 1994 to provide a source of external quality control for UK competent monitoring authorities (CMAs)
- Also open to consultants and non-UK participants
- Reports to HDBSEG (the Healthy & Biological Diverse Seas Evidence Group) under the UK's Marine Monitoring & Assessment Strategy (UKMMAS)
- Helps to standardise results and methods by providing Best Practice Guides, Taxonomic Workshops and Training Exercises
- Currently 7 components

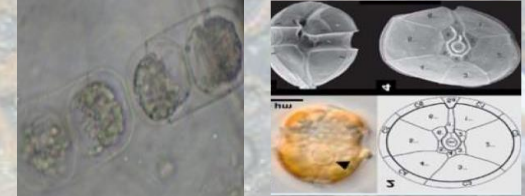

Zooplankton

Identification, Enumeration, Quizzes and Workshops

Phytoplankton

Identification, Enumeration, Ocean Teacher HAB Quiz, Workshops

Epibiota

Benthic Imagery Action Plan, Quality Assurance Framework and Workshops
